Enjoy outdoors, nature, and unusual 'stuff' photography. Use Canon equipment. Photography is just a hobby. Enjoy learning and using all the new technology for post processing, but believe that the

initial photo shot is the key.

Greatly enjoy the Chasco Camera Club meetings. The photo competitions, assignments, field trips, critiques have greatly improved my photography skills. Members have been extremely complementary of my work and more than willing to share tips and give advice on equipment, photo locations, and post processing.
